SHRAVNI JEHURKAR

9175407463 | shravni.jehurkar@gmail.com | LinkedIn | GitHub

Technical Skills

Languages: Python, C++, JavaScript, TypeScript, SQL, HTML, CSS
Web/Backend: React, Angular, Node.js, Express.js, FastAPI, REST APIs
Data/ML: PyTorch, SQL, TensorFlow, OpenCV, NumPy, Pandas
Tools: Git, GitHub, Three.js

Education

B.Tech, CSE-AIML –Vellore Institute of Technology, Bhopal, India *Sept 2023 – May 2027*
CGPA: 8.81

Experience

Forward Deployed Engineer Intern — ALTEN India *Jun 2026 – Sep 2026*

- Developed the DCC application using React, TypeScript, FastAPI, and REST APIs, implementing frontend features and backend services.
- Designed and integrated end-to-end application workflows, connecting React interfaces with FastAPI services through RESTful APIs.
- Gained an understanding of MBRDI engineering and digitalization use cases through technical walkthroughs, while developing, testing, debugging, and refining application functionality.

AI Intern — BharatSkillz, Jaipur, India *May 2025 – Jul 2025*

- Built and trained CNN and RNN models for computer vision and sequence-modeling tasks, owning the pipeline from data preprocessing through training and evaluation.

Projects

3D Digital Twin:Production Line – Angular, TypeScript, Three.js, Node.js *Apr 2026 – Aug 2026*

- Engineered a real time 3D digital twin of a beverage manufacturing line, simulating automated production workflows and multi-stage machine operations.
- Built a state driven simulation engine for synchronized conveyor, bottle, and machine behavior across the production lifecycle using Three.js and Angular.
- Developed a Node.js REST backend and modular machine architecture enabling scalable integration of new production stations and configurations.

Goaldigger: Career Guidance Website — React, Node.js, Express *Feb 2026 – Apr 2026*

- Built a career guidance platform based on the Japanese Ikigai framework, with dynamic questionnaires mapping user interests to career paths.
- Led product design and vision end-to-end; adopted by 500+ students with a 4.8/5 CSAT score.

Face Mask Detection — Python, OpenCV, TensorFlow, CNN *October 2025 – December 2025*

- Designed a real-time computer-vision pipeline combining Haar Cascade face detection with a custom CNN classifier to identify Mask / No Mask.
- Built the complete OpenCV video-processing loop for webcam input, face extraction, preprocessing, and real-time inference.

Certifications

- GEN AI Using IBM Watsonx — IBM Career Education Program
- JPMorgan Chase — Advanced Software Engineering Job Simulation
- Siemens Mobility — Project Management Job Simulation
- Deloitte Australia — Data Analytics Job Simulation
- Cloud Computing — NPTEL
- Introduction to Industrial IoT — NPTEL
